**DETAILED ACTION**

1. Claims 1-15 are pending.

***Response to Amendment***

2. Applicant has amended claim 7 to overcome the §112, 2<sup>nd</sup> ¶ rejection therefore the rejection is withdrawn.
3. Applicant has amended claim 8 to overcome the 35 U.S.C. 101 rejections to claims 8-13. Additionally, applicant has amended the specification to show support for this amendment. The amendment to the specification is not considered new matter because the applicant has amended the specification to further clarify fig. 1, #140, to state wherein the computer program product 140 is embedded on a computer readable medium. This is not considered new matter because the computer program product 140 is clearly illustratively shows a computer readable medium in the form of a computer disk.

***Response to Arguments***

4. Applicant's arguments regarding claims 1-7 have been fully considered but are non-persuasive. Applicant has not specifically disclosed where in the specification a "rendering device" maybe implemented in hardware or a combination thereof. Applicant's specification, page 3, lines 31-33 disclose "some features indicated in the drawings are typically implemented in software and as such represent software entities such as software modules or objects", and does not suggest a hardware alternative.

Applicant argues "the receiving module 111 may be implemented in software, hardware, or combinations thereof." However, applicant does not point to a description in the specification of the various means recited in the claims.

***Claim Rejections - 35 USC § 101***

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 1-7 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Page 3, lines 31-33 of the specification state "some features indicated in the drawings are typically implemented in software and as such represent software entities such as software modules or objects" causing the claims to lack a structural relationship to be entirely implemented in software and not include an underlying medium.

***Allowable Subject Matter***

7. Claims 1-7 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101, set forth in this Office action.
8. Claims 8-15 are allowed.

***Conclusion***

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
